# ROLL GMBH - INTRODUCING OURSELVES

Roll GmbH is German leading manufacturer of machines for the removal of floor coverings, machines for surface preparation and machines and tools for the installation of all kind of floor coverings. Furthermore a large assortment of different flooring profiles is offered for a wide range of applications.

Roll GmbH also is the Roll family and their dedicated team which works with passion for the flooring technology for more than 35 years. Since the company was founded by Dieter and Rosemarie Roll, mile stones were set in the flooring industry e.g. the Bullystripper. The second generation family business has set new standards for the industry in recent years.

The expansion of the research and development department enabled innovation activities aimed at technological leadership, and the history of self-propelled stripper machines with an alternative drive concept and intelligent controls began in 2013 with the introduction of the ROLL-STRIPPER RO-1. Meanwhile, Roll GmbH provides a complete roll stripper family after introducing the ROLL-STRIPPER RO-2 in 2015, the ROLL-STRIPPER RO-3 in 2017 and the ROLL-STRIPPER RO-5 in 2022.

At the same time, the range of floor grinding machines was developed, which sustainably improves the surface processing options for floor layers. After the introduction of the floor grinding machine RO-300 in 2016, the range has been expanded over the years to include the larger floor grinding machine RO-400 and the smaller floor grinding machine RO-250. All machines are manufactured on the in-house assembly line.

The range of tools and machines is rounded off by a system of aluminum floor profiles. Thus, Roll GmbH offers an overall concept for every floor layer.

In order to accommodate the growing product range, a new logistics center with a 3,000 square meter storage, logistics and administration area was opened in the Engstingen-Haid business park on October 1, 2023. The new building offers the 25 employees plenty of space and growth potential for new products and the next generation.

„We not only want to satisfy our customers, we want to fascinate them“ this is what the siblings Beatrice, Stephan and André Roll clearly want to express. This works best with products which convince and furthermore with a remarkable service, these two features make the Roll GmbH successfully all over the world.

# STRIPPER MACHINES

FOR REMOVAL OF FLOORING COVERINGS

# STRIPPER MASCHINES

## ROLL-STRIPPER RO-1.1

Compact ride-on stripper for professional removal of all extremely bonded floor coverings on medium and large areas.

### Special features:

- For medium and large areas
- Stepless speed control up to 37m / min
- Maximum efficiency by the striking mechanism
- Stepless working angle for optimal use on different floor coverings and surfaces
- High contact pressure of the stripper tool by additional lifting motor
- High torque (double torque of the proven RO-2 stripper)
- Very smooth running thanks to large drive wheels (400mm)
- Effortless work by comfortable joystick control
- Quiet operation by industrial electric motors (85 dB (A))
- Very manoeuvrable and compact

### Areas of application:

- Removal of parquet
- Removal of ceramic tiles
- Removal of elastic floor coverings
- Removal of textile floor coverings
- Removal of PVC floor coverings
- Removal of sports floor coverings

### Included in delivery:

- Stripper-tool 350mm flat
- Stripper-tool 350mm U-shape
- 10m industrial extension cable
- Tool set
- Personal protective equipment

### Technical specifications:

Drive engines left/right: each 1,5 kW, 230 volts  
 Torque: 654 Nm  
 Adjustable speed: up to 37 m / min  
 Stroke engine: 1,1 kW, 230 volts  
 Blow count: 2000 beats per minute (bpm)  
 Lifting motor: 8600 N nominal force  
 Adjustable working angle: up to 40°  
 Working width: 120 / 250 / 300 / 350 mm  
 Dimensions: 1050 x 600 x 1100 mm  
 Weight: 528 kg, modular construction

## ROLL-STRIPPER RO-2

The ROLL-STRIPPER RO-2 is a compact stripper machine with chain drive for professional removal of bonded floor coverings such as parquet, carpeting, linoleum, PVC and vinyl.

- powerful industrial motors
- innovative drive technology
- innovative tool technology
- joystick operation
- low vibration and noise level
- easy to transport

### Technical specifications:

Drive engine: 1,5 kW, 230 volts with worm gear  
 Torque: 327 Nm  
 Stroke engine: 1,1 kW, 230 volts  
 Blow count: 2500 beats per minute (bpm)  
 Stroke length: adjustable in 3 levels  
 Working width: up to 350 mm  
 Dimensions: 380 x 760 x 1100 mm  
 Weight: 195 kg

### Included in delivery:

- Stripper-tool 250mm flat
- Stripper-tool 250mm U-shape
- 10m industrial extension cable
- Tool kit
- Carrying handles
- Personal protective equipment
- Transport wheels

## Der ROLL-STRIPPER RO-3

The ROLL-STRIPPER RO-3 is a compact stripper machine with chain drive for professional removal of bonded floor coverings such as carpeting, linoleum, PVC and vinyl. The large transport wheels allow transport by 1 person. This makes the new ROLL-STRIPPER RO-3 the ideal companion for all installation companies.

- fast and easy transport to the place of use with pneumatic transport wheels
- transportable by 1 person
- effortlessly working with the stepless joystick control
- use in noise sensitive areas due to low vibration and noise level
- compact and manoeuvrable
- powerful through the use of industrial motors
- effective on different floor coverings with infinitely adjustable working angle

### Technical specifications:

## Important Notes

Pre-cut floor coverings are generally easier to remove than those cut with self-cutting blades.  
The choice of blade, whether bevelled bottom or bevelled top, depends on the strength of the subfloor.  
Larger format parquet flooring than mosaic tiles must be pre-cut (5-5 cm).  
The stronger the adhesive bond, the narrower the blade must be.

# STRIPPER MACHINES

## PARQUET SAW RO-4

Indispensable for the dismantling of parquet!

With the parquet saw RO-4, the parquet is pre-cut very quickly and in an upright position. You optimize the preparatory work for dismantling in order to remove parquet even faster and more effective with the ROLL-STRIPPERs.

- very ergonomic use in upright position
- extremely effective with the special saw blade
- simple and safe handling with the lowering mechanism
- adjustable cutting depth from 0 to 22mm
- dust-free working with the integrated dust extraction device

### Technical specifications:

Drive engine: 2200 W, 230 V  
 Rotation: 4000 rpm  
 Blade: Ø 180 mm  
 Cutting depth: 0 mm - 22 mm  
 Dimensions: 500 x 280 x 950 mm  
 Weight: 31 kg

**NEW** Delivery including diamond saw blade.

## STAIRCLIMBER CARGOMASTER TYPE CC160

The CC160 stair climber is the right choice when it comes to medium-heavy or bulky loads. Its low weight and easy handling make the CargoMaster an indispensable tool.

### Advantages

- Safe transport, up to 160 kg over stairs
- Step edge braking system
- ComfortStep for gentle climbing
- Single step switching
- Multi-level battery indicator

### Technical specifications:

Lifting capacity: 160 kg  
 Weight with quick-change battery: 28,9 kg  
 Height | width | Depth in mm: 1065-1490 | 446 | 300  
 Range on one battery charge: 8-25 floors  
 Rate of climb: 12- 25 steps per minute  
 (rate of climb and range may decrease as load increases)

### Delivery:

Stair climber CargoMastere Typ CC160, 1 battery, 1 charger, platform size 400x440x8mm, tension belt

60mmx210mm with U-shape 45° bending.

Self-cutting for soft floor coverings.

17.14592

27,38

## JUMBO BLADE FOR BULLYSTRIPPER

With anti-stick coating (Teflon) and waved cut,  
ideal for carpets with felt back, PVC and lino. 210mm.

17.14595

45,45

## BLADE FOR BULLYSTRIPPER

130x210mm for soft floor coverings.

17.14590

22,37

## BLADE FOR HANDSTRIPPER

Standard blade 145mm, trapezium, for universal use

17.14511

12,29

## BLADE FOR HANDSTRIPPER "PLUS"

Special blade 108mm hardened, 1,5mm thick,  
with higher wear resistance

17.14512

25,93

## CARPET CLAMP DE LUXE

With the carpet clamp "de luxe" weakly bonded or only fixed floor coverings can be removed manually.

By pulling on the ergonomic handle, the floor covering is clamped in the toothed clamping device. Made from a special aluminum alloy.

The must-have for every floor layer, in addition to the stripper machines!

# ROLL-FLOOR GRINDING MACHINES

FOR EFFICIENT SURFACE PREPARATION

- HIGH AREA PERFORMANCE  
thanks to high speed and torque

- LOW-DUST WORK  
with the integrated dust extraction system

- QUIET INDUSTRIAL ELECTRIC MOTORS  
enable use in sensitive areas

- MADE IN GERMANY  
development and production at the Sonnenbühl location

# FLOOR GRINDING MACHINES

## FLOOR GRINDING MACHINE RO-400

17.15840

5.590,00

The ROLL floor grinding machine RO-400 was developed for surface preparation in industrial and commercial properties. With the powerful three-phase motor, you can easily carry out any surface preparation works.

- high performance through a 400mm diameter
- powerful 4.0 kW three-phase motor
- direct-drive mechanism
- operating hours counter
- effortlessly working due to the smooth running of the machine and adjustable drawbar
- easy transport due to compact dimensions and a foldable drawbar
- dustfree working with the integrated dust extraction device

**Technical specifications:**

Working power: 4,0 kW / 400 V

Rotation: 1450 rpm

Weight: 79 kg

Working width: 400 mm

## FLOOR GRINDING MACHINE RO-300

17.16800

4.820,00

The ROLL floor grinding machine RO-300 sets new standards in surface preparation. Whether removing floor covering residues, adhesive residues, leveling compounds or floor coatings - regardless of what you find after removing the floor covering - with the floor grinding machine RO-300 you can prepare the surface quickly and effectively.

- soft start and low power consumption, therefore no triggering of fuses on weakly secured construction sites
- effortlessly working due to the smooth running of the machine
- dust-free working with the integrated dust extraction device
- easy transport due to compact dimensions and a foldable drawbar
- individual billing with the integrated hour meter
- long service life and effectiveness of the tools Made in Germany

**Technical specifications:**

Working power: 2200 W / 230 V

Rotation: 1650 rpm

Weight: 63 kg

Working width: 300 mm

## FLOOR GRINDING MACHINE RO-300 DIRECT DRIVE

17.16900

4.190,00

As previously described, but with a direct driven 400 volt motor.

**Technical specifications:**

Working power: 3,0 kW / 400 V

Rotation: 1410 rpm

Weight: 62 kg

## FLOOR GRINDING MACHINE RO-250

17.10250

3.520,00

The ROLL floor grinding machine RO-250 is a compact grinding machine for surface preparation on small to medium-sized areas. For removing any residues after removing floor coverings such as adhesives, leveling compounds, coatings and much more.

- high power and area performance
- easy transport through the foldable drawbar
- can be used very well in the edge area by adjusting the drawbar
- dust-free work with the integrated dust extraction device

**Technical specifications:**

Working power: 1800 W / 230V

Rotation: 1450 rpm

Weight: 49 kg

Working width: 250 mm

# FLOOR GRINDING MACHINES

## DIAMOND DISC "V12"

Diamond disc for grinding work on mineral surfaces.  
For sanding screeds and fillers, sanding loose fillers and thin, non-smearing adhesive layers.

Ø 400mm grit 30/40	17.15875	1.051,23
Ø 400mm grit 30/40 (soft bond)	17.15859	1.051,23
Ø 300mm grit 30/40 (red)	17.16875	859,84
Ø 300mm grit 30/40 (hard bond)	17.16832	859,84
Ø 300mm grit 30/40 (soft bond)	17.16859	859,84
Ø 300mm grit 60/80 (salmon red)	17.16876	859,84

Ø 160mm	17.16895	492,47

## DIAMOND DISC "V10"

Diamond disc for grinding work on mineral surfaces.  
For sanding screeds and fillers, sanding loose fillers and thin, non-smearing adhesive layers.

Ø 300mm	17.16841	530,00
Ø 250mm	17.10241	490,00

## PCD-DISC "PCD-TRAPECIUM"

PCD milling disc with trapezoidal PCD segments and support segments for removing floor coatings, paints, all types of adhesives and sealants (such as epoxy resin, polyurethane and acrylic), as well as for milling off levelling compound.

Ø 400mm	17.15894	1.179,43
Ø 300mm	17.16868	1.107,19
Ø 250mm	17.10268	982,65

## PCD-DISC "PRO+TRAPECIUM"

PCD milling disc with half round PCD segments, trapezoidal PCD segments and support segments for removing all types of adhesives, as well as for milling off fillers, tile adhesives and coatings.

Combination of PCD trapezoid and PCD PRO disc.  
High effectiveness combined with aggressiveness and longevity.

Ø 400mm	17.15895	1.161,34
Ø 300mm	17.16865	1.143,92

## PCD-DISC "PRO"

PCD milling disc with PCD segments and support segments for removing all types of adhesives and for milling off fillers, tile adhesives and coatings.  
Particularly aggressive and durable due to the size and arrangement of the PCD segments.

Ø 400mm	17.15880	1.220,56
Ø 300mm	17.16880	1.039,94
Ø 250mm	17.10292	921,61
Ø 160mm	17.16896	704,10

## PCD-DISC "K8"

PCD disc with PCD grit segments for grinding work on mineral surfaces and for removing thin adhesive films and coatings.

Ø 300mm	17.16844	620,00
Ø 250mm	17.10244	565,00

# FLOOR GRINDING MACHINES

## PCD-DISC "CR9"

PCD disc with PCD grit segments for grinding work on mineral surfaces and for removing thin adhesive films and coatings.

Ø 400mm  
Ø 300mm  
Ø 250mm  
Ø 160mm

17.15889	1.121,82

# HANDHELD GRINDING MACHINES

## HAND GRINDING MACHINE RO-125

19.14781

1.067,36

Application: universally applicable, ideal for edge areas and on stairs.

For all subfloor works with a wide range of accessories. Including vacuum attachment for the connection of an external industrial vacuum cleaner.

### Technical specifications:

Working power: 1530 W

Rotation: 3400-8000 rpm stepless

Weight: 4,5 kg

Working width: 125 mm

Delivery in metal carrying case.

Delivery without diamond disc.

## DIAMOND DISC "FORGED"

19.14333

156,35

Ø 125 mm with special forged segments inductively welded.

Applications: Concrete, abrasive concrete, screed and spackle.

## DIAMOND DISC "Z-SEGMENT FORGED"

19.14336

190,51

Ø 125 mm with forged diamond segments in a Z arrangement for grinding work on mineral surfaces. For leveling surfaces.

## DIAMOND DISC "R-SEGMENT"

19.14337

132,87

Ø 125 mm with forged diamond segments in a R arrangement for grinding work on mineral surfaces. For leveling surfaces.

## HYBRID DISC

17.16469

265,77

Ø 125 mm with poly-crystalline diamond cutters (PCD) and diamond segments.

Universal disc to remove coatings, paintings, all kinds of adhesives and sealings as well as for milling of leveling compounds and tile adhesive

## PCD-DISC "PRO"

17.16485

509,04

Ø 125 mm with poly-crystalline diamond cutters (PCD) and PCD supporting elements.

To remove thick coatings and paintings, rough remainders of adhesives and sealings (e.g. epoxy resin, polyurethane, and acrylate). The PCD supporting elements prevent a deep engagement of PCD cutters.

Extremely long service life due to very high PCD proportion!

## DIAMOND DISC FOR WOOD

17.16486

253,45

Ø 125 mm to remove very hard and lubricating coatings on wooden floors.

## DIAMOND DISC 130mm x 25mm

17.16484

159,00

Special size 130mm x 25mm mounting hole for Festool renovation grinder. Includes reduction ring to 22,2mm mounting hole for common angle grinders.

Areas of application: for concrete, abrasive concrete, screed, filler.

## SANDING FRAME FOR RO-125

24.70410

118,45

For better handling and long-term relaxed work.

The correct working angle is set with 2 height-adjustable castors.

## WOOD SANDING KIT FOR RO-125

24.70400

144,16

Application as edge sander. Including: Velcro sanding disc Ø 125mm for velcro sanding discs and a sanding frame with 2 height adjustable castors.

# HANDHELD GRINDING MACHINES

## HAND GRINDING MACHINE RO-180

19.14870

1.311,66

Universally applicable for all subfloor works with a wide range of accessories. Including vacuum attachment for the connection of an external industrial vacuum cleaner.

### Technical specifications:

Working power: 2600 W  
Rotation: 6500 rpm  
Weight: 9,3 kg  
Working width: 180 mm

Delivery in metal carrying case.  
Delivery without diamond disc.

## DIAMOND DISC "FORGED"

Ø 180 mm with special forged segments inductively welded.

Applications: Concrete, abrasive concrete, screed and spackle.

19.14814

319,76

## DIAMOND DISC "Z-SEGMENT FORGED"

Ø 180 mm with forged diamond segments in a Z arrangement for grinding work on mineral surfaces. For leveling surfaces..

19.14835

380,99

Made in Germany

## HYBRID DISC

Ø 180 mm with poly-cristalline diamond cutters (PCD) and diamond segments.

Universal disc to remove coatings, paintings, all kinds of adhesives and sealings as well as for milling of leveling compounds and tile adhesives.

19.14815

393,70

Made in Germany

## PCD-DISC "PRO"

Ø 180 mm with poly-crystalline diamond cutters (PCD) and PCD supporting elements.

To remove thick coatings and paintings, rough remainders of adhesives and sealings (e.g. epoxy resin, polyurethane, and acrylate). The PCD supporting elements prevent a deep engagement of PCD cutters.

Extremely long service life due to very high PCD proportion!

19.14803

673,00

Made in Germany

## DIAMOND DISC FOR WOOD

Ø 180 mm to remove very hard and lubricating coatings on wooden floors.

19.14816

512,22

## SANDING FRAME FOR RO-180

24.70265

180,29

Chassis for the hand grinding machine RO-180 (19.14870) for better handling and long-term relaxed work. The correct working angle is set with 2 height-adjustable castors.

# HANDHELD GRINDING MACHINES

## EDGE- AND STAIR SANDER ROMO-125

24.70300

1.178,57

For sanding wooden floors, parquet and cork, along the wall and on stairs.  
Due to the adjustable cover you can work close to the wall. Including vacuum attachment for the connection of an external industrial vacuum cleaner.

### Technical specifications:

Working power: 1530 W  
Rotation: 3400-8000 rpm stepless  
Weight: 4,7 kg  
Working width: 125 mm

Delivery with velcro sanding disc Ø 125mm for velcro sanding discs and a sanding frame with 2 height adjustable castors.

Delivery in metal carrying case.

## VELCRO SANDING DISC Ø 125mm

27.00393

25,71

For hand grinding machine RO-125 | ROMO-125 and angle grinders.  
Used with Velcro sanding discs 125mm.

## SANDING DISC Ø 125mm

27.00394/1

22,76

For hand grinding machine RO-125 | ROMO-125 and angle grinders.  
Used with sanding discs 125mm.  
Including nut M14

## SANDING FRAME FOR ROMO-125

24.70410

118,45

For better handling and long-term relaxed work.  
The correct working angle is set with 2 height-adjustable castors.

## WOOD SANDING KIT FOR ROMO-125

24.70400

144,16

Application as edge sander. Including: Velcro sanding disc Ø 125mm for velcro sanding discs and a sanding frame with 2 height adjustable castors.

# HANDHELD GRINDING MACHINES

## MINI SANDER

19.14970

396,39

Handy mini sander for sanding work on wooden and parquet floors in the edge area and corners, hard-to-reach places and on stairs.

Use as a tile cutter with the diamond cutting disc.

In the set incl. sanding pad 50mm and abrasives.

- 1000 watts of power
- variable speed up to 18000 rpm via belt drive guarantees high performance
- rubber pad 50mm
- dust extraction adapter
- transport bag

## FLEXIBLE RUBBER PAD 50mm

19.14972

20,39

## ABRASIVE DISC Ø 50mm WITH 8mm CENTER HOLE

High quality for the professionals.

Pack of 25 pieces.

Grit 40  
Grit 60  
Grit 80

19.14990  
19.14992

22,57

## CARBIDE CUTTER DISC 50mm

19.14974

50,04

For parquet repairs.

- Professional disc with 2 carbide teeth
- 10 mm cutting depth
- 4 mm cutting width

## DIAMOND DISC 50mm

19.14975

53,87

For cutting tiles and screed.

## GRINDING DISC FOR MINI SANDER

19.14976

50,04

Made of silicon carbide.  
Pack of 3 pieces.

# SINGLE DISC MACHINES

## SINGLE DISC MACHINE RO-2200 2.0

19.16205

2.564,70

Robust and powerful single disc sanding machine for all subfloor preparation works from sanding to the effective removal of adhesive and floor covering remainders, filler, leveling unevennesses in the subfloor as well as for cleaning and maintaining floors.

**Technical specifications:**

Working power: 2200 W  
Rotation: 150 rpm  
Weight: 41,0 kg  
Working width: 400 mm

Pre-installed for ROLL vacuum system

## SINGLE DISC MACHINE RO-1800 2.0

19.16200

2.161,97

Universal single disc machine for all subfloor works, as well as for cleaning and maintenance.

**Technical specifications:**

Working power: 1800 W  
Rotation: 150 rpm  
Weight: 37,0 kg  
Working width: 400 mm

Pre-installed for ROLL vacuum system

## SINGLE DISC MACHINE RO-2000

19.14180

1.428,00

The RO-2000 is a powerful single disc machine for all subfloor preparation work and for cleaning and maintaining floor coverings.

**Technical specifications:**

Working power: 2000 W  
Rotation: 190 rpm  
Weight: 40,0 kg  
Working width: 400 mm

## LIQUID TANK

54.00541

131,77

For single disc machine RO-2000.

To be installed on the pole of the machine.  
For applying detergent etc. during work.

Till 13l capacity.

# SINGLE DISC MACHINES

## ROLL DUST VACUUM SYSTEM

19.14405

307,97

Dust extraction system universally compatible with all ROLL single-disc machines and almost all other brands for dust-free floor sanding!

The universal dust extraction system enables effective dust extraction during sanding work with single-disc machines – for a clean and safe working environment.

Included in delivery are: Extractor hood with brush strip, rubber dust seal, suction hose, suction nozzle, and sleeve for connecting to an industrial vacuum cleaner.

## VACUUM HOOD WITH BRUSH STRIP

53.50060

153,47

Replacement hood for the dust vacuum system 19.14405

## SPECIAL DRILL 34MM

53.50110

39,00

With centering aid. For drilling a 34mm diameter hole in the machine housing for mounting the extraction nozzle.

## ROLL DUST VACUUM SYSTEM

19.14210

359,00

Universal vacuum system, suitable for all Roll machines for absolutely dust-free work! Keeps the air 100% dust free.

The vacuum system is mounted to the preinstalled machine; the suction hose with adapter is connected to the industrial vacuum cleaner e.g. 19.15131.

All machines (RO-2200 2.0, RO-1800 2.0) are already pre-installed to connect this system. Also suitable for previous models of single disc machines – upon request.

Recommendation! We recommend keeping the vacuum system always mounted!

## HOLDER "SMART"

54.00155

44,02

For single disc machines RO-1800 2.0 / RO-2200 2.0 (page 20)  
For attaching the suction hose and the allen key to the handle of the machine.

## ADDITIONAL WEIGHT

53.40110

153,47

For single disc machines RO-1800 2.0 / RO-2200 2.0  
Weight 5,5 kg

# DISCS FOR SINGLE DISC MACHINES

## ROLL DIAMOND GRINDING DISC

19.14430

369,77

The ROLL diamond grinding disc is a true all-rounder for surface preparation with single-disc machines! The sturdy base plate allows for easy installation of a wide variety of grinding and milling segments – precisely tailored to your specific application. Whether diamond segments for grinding screed and other mineral substrates or PCD milling segments for removing floor covering residue, adhesives, and fillers: With the ROLL diamond grinding disc, you can equip your machine for a wide variety of tasks in no time.

Note: The grinding and milling segments are not included in the scope of delivery.

Made in Germany

Made in Germany

Made in Germany

## DIAMOND GRINDING SEGMENT GREY Grit 30/40

19.14440

112,27

Diamond segment for grinding on mineral substrates with the ROLL diamond grinding disc.

For grinding screeds, fillers, and thin, non-smearing adhesive I

## DIAMOND GRINDING SEGMENT BROWN KORN 60/80

19.14450

96,82

Diamond segment for grinding on mineral substrates with the ROLL diamond grinding disc.

For grinding screeds and fillers.

## PCD MILLING SEGMENT "TRAPEZOID"

19.14460

149,35

With three trapezoidal PCD segments and a diamond support segment for removing all types of adhesives, as well as for milling off loose filler or filler patches, tile adhesive, and coatings. The trapezoidal, sharp edges of the PCD segments make them very effective.

Suitable for use on hard and soft surfaces, firm and sandy screeds.

## PCD MILLING SEGMENT "3-BAR"

19.14490

149,35

With 3 PCD segments and a diamond support segment for removing all types of adhesives, as well as for milling off loose filler, tile adhesive, and coatings.

## ROLL DIAMOND DISC "FORGED"

19.14330

1.252,11

Grinding disc for single disc machine with 5 freely rotating diamond discs 125mm with forged segments. For sanding cement-based substrates, filler, anhydrite, coatings and leveling out small unevenness, e.g. trowel marks.

Very aggressive grinding effect with a very long service life thanks to forged and precision-welded diamond segments.

## DIAMOND DISC Ø 125mm "FORGED"

19.14333

156,35

With 6 special forged segments inductively welded.

## ROLL DIAMOND DISC "Z-SEGMENT FORGED"

19.14338

1.408,25

Grinding disc for single disc machine with 5 freely rotating diamond discs 125mm with forged Z-segments. For sanding cement-based substrates, leveling compound, anhydrite, coatings and leveling small unevenness, e.g. trowel marks.

Very aggressive grinding effect with a very long service life thanks to forged and precision-welded Z-diamond segments.

## DIAMOND DISC Ø 125mm "Z-SEGMENT FORGED"

19.14336

190,51

With 8 special forged Z-segments inductively welded.

## ROLL DIAMOND DISC

19.14320

1.024,85

Grinding disc for single disc machine with 5 freely rotating diamond discs 125mm with double row diamond segments. For sanding cementary surfaces, leveling compound, anhydrite, coatings and smaller bumps, e.g. trowel marks.

Very aggressive grinding effect with a long service life.

## DIAMOND DISC Ø 125mm "TWO-ROWED"

19.14321

122,57

Two-rowed, with high diamond content.

# DISCS FOR SINGLE DISC MACHINES

## TUNGSTEN CARBIDE RING DISC GRIT 14

For universal use! For rough grinding of cement bonded surfaces, sintered surfaces.  
For grinding of paint and coatings.

## 4-HEADED WOOD SANDING DISC

Designed for fine sanding work on wood, parquet and cork, the disc is used especially in the finishing process to achieve a high-quality, even surface.

19.14500

973,53

4 discs Ø 150mm run on high quality bearings, screwed on a steel disc, discs are with soft underlay for Velcro sanding paper, they turn due to rotation of the machine.

Efficient disc with high sanding removal.

Steel disc Ø 400mm, 21kg.

We recommend working with ROLL vacuum attachment for dust-free working area!

## STONE GRINDING WHEEL DISC

For grinding concrete, screed and spackle.

Aggressive grinding with very smooth grinding results.

# ACCESSORIES FOR SINGLE DISC MACHINES

## CURRENT LIMITER WITH SOFT START

19.14925

250,41

Maintenance-free, with long lifetime.

The tripping of the fuse and work interruption time involved is avoided!

Without jerking soft start more safety and protection of the machine is guaranteed.  
Up to 3500 W.

## INDUSTRIAL EXTENSION CABLE 10m

82.00112

146,93

3x2,5mm<sup>2</sup> incl. Schuko plug and coupling.

Features:

- VDE approved and approved
- for high mechanical loads
- with heavy-duty supporting element
- VDE cable type H07RN-F
- temperature range: 25 ° C to + 60 ° C
- striking color

## EXTENSION CABLE 10m

82.00118

62,18

3x2,5mm<sup>2</sup> incl. Schuko plug and coupling.

## CABLE DRUM 25m

82.00125

179,00

Features:

- for use on construction sites according to BGI 608 and permanent outdoor use, IP 44
- extremely abrasion-resistant, rollover-resistant and has an extreme cut and tear resistance
- acid and oil resistant, weather and microbe resistant
- cold-resistant up to 40 ° C
- 3 earthed sockets, splash-proof, with self-closing lids
- overheat protection, overheat and overload indicator
- extra sturdy tubular steel frame with exceptionally robust carrying handle with comfortable cable management
- drum body made of special plastic with reinforcing ribs

## PERSONAL PROTECTION SWITCH PRCD-S+

82.00200

329,03

Mobile protection against electrical accidents on the construction site.

Every time it is switched on and during operation the correct connection conditions are checked fully automatically.

Including visual error message.

Safety cable IP44, 16A 250V ~ 30mA with mounted solid rubber plug + coupling

## THREE-PHASE TEST PLUG 400V / 16 A 5-PIN

82.00122

52,73

For testing and measuring the correct connection of sockets, extensions, power distributors, etc.

- connection and rotating field test device
- 16 amp / 400 V, 5pin, 6 H power
- indicator lights are very bright
- protection class IP 44 suitable for construction site

# DISCS FOR SINGLE DISC MACHINES

## GRINDING BRUSH 400mm GREY

For cleaning contaminated industrial floors.  
Nylon brush with abrasive grits.

19.15305

316,95

## SCRUBBING BRUSH 400mm WHITE, ROUGH

Universal cleaning brush for shops, entrances etc.  
For tiles and synthetic floor coverings.  
Polypropylene fibre 0,7mm.

19.15310

151,82

## POLISHING BRUSH 400mm BROWN (UNION)

For polishing wax, emulsions etc. to get a shiny surface.  
For cleaning synthetic floor coverings. Nature bristle.

19.15330

159,65

## LIQUID TANK FOR SINGLE DISC MACHINES

For single disc machine RO-1800 2.0 and RO-2200 2.0.

53.80120

206,65

To be installed on the pole of the machine.  
For applying detergent etc. during work.

Till 12l capacity.

## LIQUID TANK

For single disc machine RO-2000.

54.00541

131,77

To be installed on the pole of the machine.  
For applying detergent etc. during work.

Till 13l capacity.

131,77

# PARQUET SANDING MACHINES

## PARQUET SANDING MACHINE WOODY "JUNIOR"

24.70101

8.435,70

Professional parquet sanding machine with vertical sanding – the original! High engine power and torque, necessary weight, close-to-the-edge grinding and dust-free work distinguish the parquet sanding machine WOODY.

These characteristics of the WOODY make it possible to sand or brush (structure) the plank or parquet floor from rough sanding to fine sanding with just one machine.

- for rough sanding to fine sanding with only one machine
- for multilayer- and solid parquet
- significant time savings due to less sanding in the edge area
- dust-free for your health and for the pleasure of your client
- replaces the belt sanding machine for rough sanding and a multidisc machine for fine sanding

### Technical specifications:

Working power: 2200 W, 230 V

Disc Ø: 3 x 140mm

Rotation: 680 rpm

Working width: 450 mm

Machine weight: 52 kg

Working weight: 85 kg

### Included in delivery:

- 6 discs Ø 140mm for velcro sanding discs
- pad holder (use as single disc machine)
- vacuum system with suction hose and bushing
- transport wheels
- ball caster

# PARQUET SANDING MACHINES

# PARQUET SANDING MACHINES

## PARQUET SANDING MACHINE RO-800SA

The parquet sanding machine RO-800SA is a universal floor sanding machine for all sanding work from the subsurface to the parquet.

19.16550

6.684,70

Delivery includes 4-headed sanding disc unit for direction-free sanding of wooden and parquet floors from coarse sanding to fine sanding.

Thanks to the standard mounting flange and the flexible dust extraction, all ROLL discs such as sanding discs or diamond discs can be used for surface preparation, as well as pad holders for cleaning, oiling or polishing.

If necessary, several additional weights can be mounted for more pressure.

Easy transport with the height-adjustable transport frame with large wheels and the front carrying handle.

This makes the RO-800SA parquet sanding machine a universal floor grinding machine for all surfaces.

- Coarse sanding to fine sanding on wooden and parquet floors with just one machine
- Surface preparation with ROLL sanding discs
- Dust-free with the dust extraction system when connected to a vacuum cleaner
- Easy transport with large transport wheels
- Additional weights for more pressure (option)

### Technical specifications:

Working power: 2100 watts, 230 volts, 50Hz

Output speed: 140 rpm

Working width: 400 mm

Machine weight: 50 kg

Speed of the sanding unit: 800 rpm

Sanding discs Ø: 4 x 140 mm

Weight of the sanding unit: 7 kg

Working weight: 57 kg

### Included in delivery:

- 4 discs Ø 140mm for velcro sanding discs

- 4 soft pads Ø 140mm

- dust vacuum system

- transport wheels

# DUST EXTRACTION TECHNOLOGY

CONSTRUCTION VACUUM CLEANER AND DUST PRE-SEPARATOR

# CONSTRUCTION VACUUM CLEANER

## VACUUM CLEANER 2400, LONGOPAC, FILTER CLASS H

Powerful industrial vacuum cleaner, 2-engined, with filter class H, incl. filter cleaning system, incl. accessories.

Longopac version: Dust removal via the Longopac system in the 20meter long endless hose offers many advantages over conventional disposal in the container:

- dust-free because the dust is sealed directly in the hose
- fast change reduces machine downtime
- higher capacity of the cleaner

The industrial vacuum cleaner 2400 has 2 individually switchable 1200 watt suction motors in a robust metal housing.

A vacuum indicator allows the continuous monitoring of the proper operation and possible filter clogging.

This industrial vacuum cleaner has a primary PTFE filter with 3,2m<sup>2</sup> filter surface and two HEPA filters with filter class H. With an effective filter cleaning system using the "Jet Pulse System", i.e. using negative pressure and compressed air pulses, the filter is cleaned effectively and thus guarantees a long service life of the filter and consistent suction performance.

### Technical specifications:

Power: 2400 Watts (2 x 1200 Watt)

Voltage: 220-240 V / 50/60 Hz

Filter class: hepa filter H13

Air output: 528 m<sup>3</sup> / h

Weight: 50kg

Dimensions: 66x57,5x126cm

### Accessories (incl.):

Hose 50mm nominal diameter, length: 7,5m, suction tubes, floor nozzle.

## PRE-FILTER FOR VACUUM CLEANER 2400

## VACUUM CLEANER 1700, LONGOPAC, FILTER CLASS H

19.16940

3.079,70

Powerful industrial vacuum cleaner, 1-engined, with filter class H, incl. filter cleaning system, incl. accessories.

Longopac version: Dust removal via the Longopac system in the 20meter long endless hose offers many advantages over conventional disposal in the container:

- dust-free because the dust is sealed directly in the hose
- fast change reduces machine downtime
- higher capacity of the cleaner

The industrial vacuum cleaner 1700 has 1 1700 watt suction motor in a robust metal housing.

A vacuum indicator allows the continuous monitoring of the proper operation and possible filter clogging.

This industrial vacuum cleaner has a primary PTFE filter with 1,5m<sup>2</sup> filter surface and two HEPA filters with filter class H. With an effective filter cleaning system using the "Jet Pulse System", i.e. using negative pressure and compressed air pulses, the filter is cleaned effectively and thus guarantees a long service life of the filter and consistent suction performance.

### Technical specifications:

Power: 1700 Watts

Voltage: 220-240 V / 50/60 Hz

Filter class: hepa filter H13

Air output: 300 m<sup>3</sup> / h

Weight: 40kg

Dimensions: 65x42x107 cm

### Accessories (incl.):

Hose 38mm nominal diameter, length: 5m, suction tubes, floor nozzle.

## INDUSTRIAL VACUUM CLEANER 1450MF

19.15131

1.027,94

Professional device for industrial use. The multifilter improves the air filtration and also withstands difficult dusts (cement, gypsum, soot particles etc.). With stainless steel container and rubberized rollers.

NEW: With additional motor protection filter

- very compact
- extremely powerful
- with additional socket with automatic switch-on

### Technical specifications:

Power: 1450 W  
Airflow: 245 m<sup>3</sup>/h  
Negative pressure: 40 kPa  
Capacity: 30 l  
Weight: 13,3 kg  
Size: 45 x 45 x 76 cm  
Filter class: M

### Accessories (incl.):

Hose 38mm nominal diameter, length: 5m, suction tubes, floor nozzle.

The dust pre-separator for industrial vacuum cleaner 1450MF consists of an intermediate ring with cyclone pre-separator, multi-filter for intermediate ring and cover plug.

## MULTIFILTER FOR DUST SEPARATOR

79.40007

153,00

Filter class M

## INDUSTRIAL VACUUM CLEANER 2300

19.15206

1.860,04

Powerful yet quiet industrial vacuum cleaner, 2-engined, with filter class M, incl. filter cleaning system, incl. accessories.

The industrial vacuum cleaner 2300 has 2 individually switchable by-pass suction motors in a robust metal housing, isolated to reduce the loudness. Two placed at the sides handles allow easy lifting the motor head.

This industrial vacuum cleaner has a star filter with 2m<sup>2</sup> filter surface. By external filter cleaning device the filter is moved vertically is cleaned in order to guarantee a long service life of the filter and a constant suction output.

The mobile storage container can be lowered and be emptied quickly and safely. The vacuum cleaner is mounted on a robust steel frame with non-marking castor wheels and brake.

### Technical specifications:

Power: 2300 W (2 engines 230 V / 50 Hz)  
Airflow: 360 m<sup>3</sup>/h  
Negative pressure: 25 kPa  
Capacity: 45 l  
Filter surface: 20.000 cm<sup>2</sup>  
Weight: 48 kg  
Size: 53 x 60 x 120cm  
Filter class: M

### Accessories (incl.):

Hose 50mm nominal diameter, length: 5m, suction tubes, floor nozzle.

# CONSTRUCTION VACUUM CLEANER

## ROLL DUST SEPARATOR

Maximize the efficiency of your industrial vacuum cleaner!

The ROLL dust separator captures up to 99% of the dust before it reaches your vacuum cleaner, no filter clogging and no loss of suction. Thus, the durability of the filter and the vacuum cleaner is substantially increased. Easy to use, effective in the result.

- protects the vacuum cleaner filter
- no loss of suction
- no clogging of the filter
- easy to empty
- 5 castor wheels design prevents tilting of the dust separator
- steel tank with inner coating

Delivered with cyclone, 45l steel tank, wheeled base, connectors and hose, dust bag.

# CONSTRUCTION VACUUM CLEANER

## AIR CLEANER 1800

19.15235

2.039,62

The air cleaner 1800 generates negative pressure in the room and absorbs the dust particles in the air, thus a lowdust renovation is guaranteed. Dust can no longer spread into the adjoining rooms and thus reduces cleaning work after the renovation.

The use of the air cleaner 1800 stands for professional appearance and adds value for your customer. The air cleaner 1800 can be set up quickly and easily. The air cleaner 1800 has two filter technology with a prefilter G4 and a HEPA filter.

Special features:

- compact and powerful
- filters up to 99.995% from the room air
- maximum air output 1800 m<sup>3</sup> / h
- adjustable fan motor
- quiet operation
- ergonomic handle

### Technical specifications:

Power: 420 watts, 230 volts  
Air volume: 1800 m<sup>3</sup> / h  
Prefilter area: 0.5 m<sup>2</sup>  
Microfilter area: 5.0 m<sup>2</sup>  
Filter class: M (H optionally available)  
Outlet Ø: 300 mm

# LINOLEUM AND PVC INSTALLATION TOOLS

## LINO STRIP CUTTER VARIO 110

Professional tool for cutting stripes of lino, PVC, CV and rubber floors, from 0 till 110mm. Can also be used as an edge trimmer. Stepless adjustment of the cutting width. Ergonomic design.

15.12421

253,57

With the unique ROLL-3-blades-system – due to the slightly inclined blades floors can be cut very easily.

Convertible to cutting bar till 355mm!

## LINO STRIP CUTTER VARIO 355

Compare Vario 110. For cutting stripes from 0 till 355mm.

15.12425

360,71

## CUTTING BAR 110MM

For lino strip cutter Vario 355, for stripes till 110mm. Works with ROLL-3-blades-system.

15.12428

138,86

## CUTTING BAR 355MM

For lino strip cutter Vario 110, for stripes till 355mm. Works with ROLL-3-blades-system.

# LINOLEUM AND PVC INSTALLATION TOOLS

## LINOCUTTER ROLLINO

Professional seam cutter for lino, PVC and vinyl (LVT).

15.12639

271,37

Overlaying lines of lino can be slit and cut exactly in the right position of the underlaying material.

Advantages:

- robust baseplate runs on bearings and thus the Linocutter ROLLino slides easily on top of the floor – important for sensitive design floor coverings and PU-coated floor coverings
- blades are slightly bent which ensures effortless scribing/cutting
- stepless adjustment of cutting width and cutting depth
- due to the cut-out in the baseplate the Linocutter ROLLino can be lead easy at the edge of the floor
- Linocutter ROLLino works with customary trapezium or hook blades
- besides trapezium blades also hooked blades can be added: special advantage: thin floor coverings can be cut in one step
- blade changing without extra tools

## GROOVING MACHINE EASY 1200

The EASY 1200 grooving machine is a handy tool with stepless grooving depth adjustment and an adjustable side wheel for safety studded flooring. It's designed for grooving the joint between floor coverings and for use with welding cords for thermal welding of elastic heterogeneous and homogeneous plastic floor coverings such as PVC, linoleum, and rubber.

16.13640

1.009,40

Supplied in a metal case, including a carbide blade and a dust bag.

Technical specification:

Power: 1200 W, 230 V

Rotation: 13.000 rpm

Weight: 8,5 kg

Carbide blade: 130mm, 12 teeth

Cutting depth: 0 - 4,5 mm stepless

## CARBIDE BLADE FOR GROOVING MACHINE EASY 1200

# LINOLEUM AND PVC INSTALLATION TOOLS

## LEISTER WELDING MACHINE UNIFLOOR 500

16.13891

4.736,97

Leister's reliable automatic floor welder, UNIFLOOR 500, is a fresh and reimagined version of the proven UNIFLOOR E/S models. It is suitable for welding the joints in resilient floor coverings made of plastic such as PVC, CV, PUR, antistatic ESD floors, as well as for sealing the joints in natural coverings made of linoleum and rubber.

- automatic nozzle rotation device
- welding rod pressure roller can be raised and locked
- integrated side cutter

### Technical specifications:

Power: 2300 W, 230 V, 50/60Hz  
Temperature: 100-560° C stepless  
Air flow range: 45-100%  
Speed: 0,7-7,5 m/min  
Nozzle air slide [mm]: small, 1,6  
Size (LxBxH): 562 x 289 x 440mm  
Weight: approx. 15,5kg

## WELDING MOBILE

16.13795

195,70

Professional tool to make an easier job with hand hot air tools i.e. set of welding mobile and hot air tool works similar to a welding machine.

For welding PVC, rubber, lino and polyolefins. For short lanes as well as large areas. Due to the rubber clip (quick-fastener) all customary hot air tools (Leister Triac, Forsthoff, Steinel) can be fixed fast and easily.

Due to front and back rollers the system can lead stabilised in the grooved seam. Working angle adjustable.

For cooling the hot air tool, just tilt system backwards.  
(Delivery without hot air tool)

## LEISTER HOT AIR TOOL TRIAC ST

16.13796

461,12

The successor to the legendary Leister Triac S is characterized as its predecessor through handling, reliability and versatility.

For welding PVC, rubber, polyolefins and lino floors.  
Ideal to use with Welding car 16.13795.  
Incl. Round nozzle 16.13830. Delivery in carrying case.

### Technical specifications:

Power: 1600 W, 220 V  
Temperature: 40-700 °C, stepless

## LEISTER HOT AIR TOOL TRIAC AT

16.13794

606,46

The TRIAC AT is an intelligent hot-air hand tool for welding and shrinking plastics that is suitable for on-site use. With large digital display and intelligent «eDrive» operating unit.

### Special features:

- the set temperature levels off automatically, voltage fluctuations are compensated
- the thermowell in front of the heating element guarantees precise temperature
- the air volume can be adjusted independently of the temperature

Incl. Round nozzle 16.13830. Delivery in carrying case.

### Technical specifications:

Power: 1600 W, 220 V  
Temperature: 40-700 °C, stepless  
Air flow: 120-240 l/min

## LEISTER MINIFLOOR - DRIVE UNIT

16.13885

1.684,62

The MINIFLOOR is the only automatic welder in the world that offers the possibility to connect a hot-air hand tool e.g. Triac ST or Triac AT in the simplest manner. The sophisticated technology of the drive unit and the drive-sensors enable welding directly from the wall. The 51mm minimum distance from the wall, ensures trouble-free welding around construction pipes and L-skirts. Weighing in at 6,6 kg including a TRIAC AT and nozzle the MINIFLOOR is a lightweight solution among comparable welders and is easily transportable. Perfect directional stability thanks to double-axis drive.

### Technical specifications:

Power drive unit: 15 W  
Voltage / Frequency: 230 V, 50/60Hz  
Speed: 0,5-5,0 m/min  
Dimensions drive unit (LxWxH): 310 x 225 x 245mm  
Weight drive unit: 5,3 kg

# INSTALLATION TOOLS

## PIN LEVELLER

Professional tool for applying adhesive and leveling compounds. Base profile 600mm with 6 replaceable spikes. Applying height is adjustable from 0 to 11mm due to a stainless shim. (without telescopic handle)

15.13466

105,06

## SPREADING KNIFE FLAT

For applying different materials, for universal use. With wooden frame and flat, stainless blade 600mm. (without telescopic handle)

15.13451

34,86

## SPREADING KNIFE WITH NOTCHED INSERT R1

For applying adhesive and leveling compounds. With wooden frame and clamp to add notched inserts 560mm. Delivery including: 1 unit notched insert R1 (compare 15.13295), holder for poles e.g. telescopic arm (without telescopic handle)

15.13450

44,44

## SPREADING KNIFE WITH NOTCHED INSERT R2 AND 2 PINS

Professional tool for applying adhesive and leveling compounds on big areas in ergonomical upright position. Including 1 unit notched insert R2 56cm and a stainless shim for setting different levels. Delivery including holder for poles e.g. telescopic arm (without telescopic handle)

15.13453

58,72

## MOVABLE JOINT WITH TELESCOPIC HANDLE

Innovative moveable joint for notched and spiked trowels for applying adhesive and leveling compounds. Ergonomic working in the cross and transverse.

- 180° movable stainless steel joint head
- shaft made of aluminum tube
- telescopic rod adjustable to the respective body size of the user

Suitable to spreading knife R1, R2 and pin leveller.

15.13458

201,88

## MOVABLE JOINT WITH SPREADING KNIFE R2

Movable joint including telescopic handle and spreading knife R2 article 15.13453

# INSTALLATION TOOLS

## ROLLER "MOHAIR"

Professional roller cover made of Velour, 4mm pile height, 250mm wide, for 8mm bow. Delivery without bow.

19.15801

10,24

## ROLLER "PACIFIC"

Professional roller with a special polyester blend cover, 11mm pile height, 250mm wide, for 8mm bow.

Suitable for coating and sealing of soils with aqueous systems. Delivery without bow.

19.15803

13,38

## ROLLER "INDUSTRIA"

Professional roller with nylon cover, 12mm pile height, 250mm wide, for 8mm bow. Well suited for floor coatings. Delivery without bow.

19.15810

10,38

## ROLLER "FOAM"

Professional roller made of foam material, rounded on both sides, 80 mm outer diameter, 250mm wide, for 8mm bow.

Suitable for sealing. Delivery without bow.

19.15811

10,38

## PRECOAT AND ADHESIVE ROLLER WITHOUT GRID

250mm for 8mm bow. For simple coatings, adhesive application, etc.

19.15806

3,79

## BOW FOR ROLLER 8mm

for 250mm roller.

19.15813

3,71

## BOW FOR ROLLER 6mm

for 250mm roller.

19.15809

2,46

## TELESCOPIC HANDLE

Adjustable till 2m. Suitable for Spiked spreading knives, spiked rollers and rolls. Made of aluminium, solid model.

19.15815

19,21

## WIPER FOR ROLLERS

For cleaning color and paint rollers. Excess liquids are stripped off the roll back into the designated container.

19.15808

12,71

# MOISTURE METERS

## CCM MOISTURE MEASURING INSTRUMENT

20.14396

669,96

Calcium-Carbide-measuring-instrument for measuring moisture in screed. With shock-proof manometer. Direct reading of the CM%. Including: 20 carbide ampoules, 100g scale, beaker, hammer, lump hammer, flat chisel, steel ball set (4) and accessories. In metal carrying case.

## CCM MOISTURE MEASURING INSTRUMENT ECO

20.14398

574,65

The entry-level model for occasional measurements, very good price-performance ratio. Equipped with mechanical manometer with a maximum pressure range up to 1,6 bar and a robust precision spring scale, delivery in a robust plastic carrying case. (without picture)

## CARBIDE AMPOULES FOR CCM INSTRUMENT

## HYDROMETTE COMPACT B2

20.14616

386,25

The Hydromette Compact B2 is an electronic moisture indicator for a non-destructive measurement of moisture in building materials. It uses the dielectric constant measuring / high frequency principle. The ball probe can be applied flexibly and is used for the detection of moisture in all kinds of building materials. It is also suitable for checking the dispersion of moisture in walls, ceilings and floors. The Hydromette has an audible alarm, which will resound if the values exceed the limit. Limits for the building materials can be set individually. An ideal pretester for use with all "CM" devices. The device is delivered fully equipped with battery and plastic box.

### Features:

- direct readings for 7 types of building materials and 2 types of insulating materials as well as tendential indication for hard and soft wood
- acoustic alarm function
- automatic calibration
- indication of the device's temperature/ambient temperature

## CAISSON MOISTURE TESTER GM-200

20.14425

185,40

For measuring moisture in concrete, plaster, cement and wood.

The measurement is carried out using a measuring ball and is therefore non-destructive. Including hold function of the last measured value.

Extremely user-friendly thanks to its compact dimensions and high display resolution. 9 measuring scales for different materials: Relative scale (%), anhydrite screed (wt%), anhydrite screed (CM%), cement screed (wt%), cement screed (CM%), concrete (wt%), gypsum plaster (wt%), hardwood ( wt%), softwood (wt%).

Recommended as a preliminary test device for CCM devices to determine the wettest spot.

## CAISSON MOISTURE INDICATOR VI-D8

20.14427

458,35

The Caisson VI-D8 moisture meter is a device for the non-destructive determination of moisture on mineral substrates such as concrete and screed, as well as for measuring surface temperature.

Available with optional accessories (KLR measurement, surface temperature, wood moisture, etc.).

Integrated 3.7 V / 3500 mAh Li-Po battery, mini-USB Type-B port for probes, USB Type-C port for connection to a PC and charger.

RGB touchscreen.

Supplied in a plastic case.

# MOISTURE METERS

## CAISSON MOISTURE TESTER VI-D1

20.14420

226,24

Very easy to use – switch ON – apply to the surface – read off digital result – compare with chart.

Especially for concrete and screed, as well as wood.  
Non destructive measurement. Digital LCD. Measure depth till 3cm.  
Measure sensor located at the bottom. Automatic power switch OFF.  
With battery. Soft leather carrying case included.  
Ideal pre-tester for CCM to find the moistest area.

## CAISSON MOISTURE TESTER VI-D4

20.14421

413,07

Moisture meter for concrete and screed moisture.

The meter has different scales for measuring moisture in different materials.  
The gold-plated spring electrodes measure via electrical resistance. The 2 sensor plates use dielectric properties to measure the moisture content of the soil down to a few centimeters deep. The combined result of the measurement is output via the display.  
The high-quality transflective graphics display guarantees perfect readability of the values under all lighting conditions even in bright daylight.

Recommended as a pre-tester for CCM devices to determine the wettest point.

## CAISSON THERMO-HYGROMETER LVT 15 IR

20.14426

237,31

Very easy to use - switch ON - adjust temperature or humidity measuring - lift the meter in the air - read digital result. For fast measuring of air temperature and air humidity, measuring in °C or F.

With dew point table on the rear side of the measuring instrument. Automatic power switch OFF. With battery. Soft leather carrying case included. With calibration certificate.

Temperature: from -10 till +50°C  
Humidity: from 5% to 99%  
Humidity tolerance: +/-2%  
Temperature tolerance: +/-0,3°C

## GANN THEROMO-HYGROMETER BL COMPACT TF-3

20.14626

222,62

The BL Compact TF 3 unit is a precise thermo hygrometer for measuring the temperature and air relative humidity in many applications (e.g. residential space, air conditioning, printing shops, warehouses, museums). The measuring sensor is exchangeable. Several of these sensors (plug-in TF stick) can be put in different places (environments). Thus, successive measurements in those places can be carried out more quickly, for long adaption times can be avoided (compared to a meter with fixed sensor).

### Features:

- Handy pocket-sized moisture measuring meter for fast measurements
- Display of three values via LCD, resolution: 0.1% or 0.1 °C
- Automatic calculation of dew point temperature
- Display of absolute air humidity in g/m<sup>3</sup>
- USB interface for transferring the measured values to a PC
- Min, Max and Hold functions for measured values
- Storage of the 5 most recent measured values
- Power supply: a 9-volt battery is included C

## KRL-MEASURING CHAMBER

20.14412

59,74

The KRL measurement method determines the moisture content of the material by determining the corresponding relative humidity above the mineral screed.

Use in conjunction with the Caisson moisture tester VI-D4 or LVT 15 IR and the climate sensor.

## CAISSON CLIMATE SENSOR CS-10

20.14413

80,34

Use in conjunction with the Caisson moisture tester VI-D4 or LVT 15 IR for determining the moisture content using the KRL measuring method.

# MEASURING INSTRUMENTS

## SURFACE HARDNESS TESTER RI-RI

16.14074

206,33

For measuring of surface bonds and strength according to „scribe fences”.  
Consists of 2 parts, punched sheet (stainless) and a special hard metal pencil.

## MEASURING WEDGE

Aluminum 0-20mm,  
for measuring uneven subfloors.

15.12313

29,61

## STEEL ANGLE

100 x 50cm zinced

15.13520

43,16

## T-HEAD 50cm

For steel rulers, to adjust 90°

15.13588

30,30

## TEMPLATE KIT FOR STAIR STEPS

16.14080

103,47

The 6 arms of different length are positioned and settled at the corners  
of the step. That way the dimension of the step can be transferred fast and  
exactly on to the flooring.

## LASER DISTANCE METER R40

20.14470

54,26

Including the basic functions for precise measurements: L/W/H, volume.  
Modern and compact device with high- quality display.

- all basic functions for precise measurements are available (L/W/H, volume)
- with integrated spirit level
- up to three measurements can be saved
- shockproof
- laser: 0.05 to 40m
- accuracy: +/-2mm

# ABRASIVES

## ABRASIVES Ø 380mm

For single disc machines, double sided, used with drive disc 19.14211.  
Premium quality for professionals. Silicium carbide on cloth/paper.  
Pack of 10 units.

Nonabrasive. Thickness 5mm.  
For the suction, or removal, excess oils & waxes.  
Pack of 10 units

19.15550

49,00

## TURBO FIBERPAD

Ø 406mm for single disc machines  
Ø 150mm with Velcro for edge sander

19.15560  
19.15570

60,76  
25,22  
16,40

The unique Fiberpad was developed for the final sanding of parquet floors and the deep cleaning of various surfaces such as wood and stone.

For the fine sanding of parquet floors, the Fiberpad replaces the classic sanding discs with 80 and 100 grit.

Thanks to the open fiber structure, the fiber pad offers a very high sanding performance and excellent dust extraction while also ensuring a scratch-free finish.

# ABRASIVES

## CERAMIC-SANDING BELTS 750x200mm

Ceramic corundum for extremely high grinding performance and service life thanks to the special self-sharpening of the ceramic grain.  
Pack of 10 units.

# KNIVES

## ROLL FLOOR INSTALLER KNIFE WITH HOLSTER

15.12548

24,33

Easy and fast blade changing without tool. Magnet included.  
Premium quality for professionals.

## DELPHIN-KNIFE WITH HOLSTER

15.12550

28,96

## SHARK-KNIFE WITH HOLSTER

15.12555

25,50

## LEATHER KNIFE HOLDER FOR PROFESSIONALS

22.14471

35,55

for 2 knives, incl. blade dispenser and pen holder.

## LEATHER KNIFE HOLDER FOR PROFESSIONALS IN SET

22.14472

101,97

In set with:

- 2x ROLL installers knife
- 2x Blades dispenser each 10 blades
- 1x Pica-Dry® Longlife Automatic Pencil

## UNIVERSAL KNIFE MOZART S2

15.12525

53,95

Including protecting cap and blade.

- compact design and the legendary SCHILLERshape
- coated surface for extra grip
- tool-free and magnet-supported easy blade change
- transparent protective cap for safe transportation
- tough fixation of blade
- hardened blade fixture for longer life time
- cartridge for up to 10 blades

## ROLL CUTTER KNIFE

15.12598

11,92

High-quality cutter knife with metal magazine for 18mm break-off blades.  
Incl. 6 break-off blades.

## CUTTER KNIFE NT

15.12494

46,09

Premium knife made of metal with rapid magazine.  
Incl. 3 break-off blades 15.12590.

## CUTTER KNIFE LIGHT

15.12596

2,70

Incl. break-off blade.

## HANDLE FOR SPECIAL BLADES

15.12630

23,77

Without blade

## BLADE NR. 22

15.12610

39,99

For handle 15.12630  
Pack of 10 units

# SCISSORS AND CUTTERS

## MITRE CUT SHEAR 6cm

For wooden and plastic profiles. 2 x 45 degree blocks.

15.12800

25,72

## MITRE CUT SHEAR LONG

With stop faces at 45° and 75 mm length of cut.

For wooden and plastic profiles. Suited to mitre cuts in wide materials.

15.12795

73,98

## MITRE CUT SHEAR WITH TRAPEZIUM BLADE

With stop faces at 45° and 50 mm length of cut.

For the particularly fine and filigree cut (f.ex. linoleum).

15.12797

56,93

## MITRE CUT SHEAR WITH LEVER

Suited to right-angled cuts in hard and flat plastic items, e.g. plastic, PVC, rubber and wooden profiles. With stop faces at 90° and 75mm length of cut. Essential for floor layers, painters, carpenters, and many other trades.

It develops its power during the cutting process and develops its greatest effect at the end of the cut - where the force is strongest and the cut would cost a normal scissors great effort. With the help of leverage, the material is cut through with ease.

15.12796

112,37

## UNIVERSAL-CUTTER BLUE

For carpets with foam back. 10 blades included.

15.12410

21,20

## BLADES FOR UNIVERSAL-CUTTER BLUE

Pack of 100 units

15.12580

33,20

## LOOP PILE CUTTER "BLACK"

For all textile coverings, except foam backing. Cuts from top to bottom.  
10 blades included.

15.12441

45,80

## BLADES FOR LOOP PILE CUTTER "BLACK"

Pack of 100 units

15.12560

35,02

## LOOP PILE CUTTER

With guiding rail for woven carpets.

15.12440

75,92

## BLADES FOR LOOP PILE CUTTER

Pack of 100 units

15.12570

81,31

# SCISSORS

## CARPET SCISSORS 10" (25cm)

Premium quality. Nickel blades, black varnished handle.

15.12690

41,25

## CARPET SCISSORS 10" (25cm) FOR LEFT-HANDERS

Premium quality. Nickel blades, black varnished handle.

15.12700

81,37

## CARPET SCISSORS 12" (30cm)

Premium quality. Nickel blades, black varnished handle.

15.12710

54,06

## NAP SCISSORS 6" (15cm) ANGLED

Premium quality. Nickel blades, bent, plastic coated handle.

15.12720

20,76

## NAP SCISSORS 7" (18cm) ANGLED

Premium quality. Nickel blades, bent, plastic coated handle.

15.12725

23,77

## BINDING SCISSORS 8" (20cm) ANGLED

Premium quality. Nickel blades, bent, plastic coated handle.

15.12715

31,30

## UNIVERSAL SCISSORS 8" (20cm)

Stainless. „Solingen“ quality, stainless.

15.12735

21,34

## UNIVERSAL SCISSORS 10" (25cm)

Stainless. „Solingen“ quality, stainless.

15.12750

37,73

# MIXERS AND MIXING RODS

## MIXER RO-1400

Powerful mixer with 1400 Watt and 2-speed gear unit.

Powerful motor for demanding mixing jobs with loads up to 50 kg.  
With soft start which prevents uncontrolled spraying of the mixing materials.  
With ergonomic soft handle.

15.12378

303,08

### Technical specifications:

Power: 1400 Watt, 230 Volt  
Rotation 1: 150-300 rpm  
Rotation 2: 300-650 rpm  
Collet: M14  
Weight: 8,00kg  
Max. mixing quantity: 50kg  
Max. mixing tool: 140mm

## MORTAR MIXING TOOL 140mm M 14

15.12393

29,61

Universal use for heavy and highly viscous compounds  
e.g. mortar, plaster, tile adhesive, lime, concrete, cement, screed, filler, epoxy etc.  
Till 50kg.

## SPINDLE MIXING TOOL 120mm M 14

15.12399

27,04

Universal use for ductile and highly viscous compounds  
e.g. mortar, plaster, gypsum, lime, rendering, tile adhesive, filler etc.  
Till 50kg.

## STANDARD MIXING TOOL 120mm M 14

15.12396

27,04

Ideal for mixing adhesives, sealing compounds, screed,  
bitumen coatings etc.  
Till 25kg.

## 2-WINGS MIXING TOOL 120mm M 14

15.12385

25,35

Special mixing tool for liquid and thin viscose materials, adhesives,  
lacquer, paint, primer etc. Tool ensures fast and homogeneous mixing  
without uncontrolled spraying.  
Till 50kg.

# MIXERS AND MIXING RODS

## MIXER HOLDER RO-30

New development from ROLL

15.12365

220,35

Flexible and universally usable holder for attaching hand mixers to standard 30 liter mixing buckets.

- time-saving
- back-friendly
- universally adjustable for different hand mixer holders, mixer lengths and bucket diameters (35-39 cm)
- compatible with mixer RO-1400

Delivery without hand mixer and mixing bucket.

## MIXING STATION

With this compact mixing station, up to 75 kg of product can be mixed quickly and efficiently.

15.12355

414,22

Easy and safe transport thanks to the well-balanced and multi-adjustable chassis.

Dust-free mix with the optional hose holder to your vacuum cleaner.

Included in delivery:

- chassis for the mixing bucket
- 75 liters mixing bucket
- holder for the mixer

## HOSE HOLDER

For dust-free mixing with the mixing station and your vacuum cleaner.

15.12356

36,19

## TURBO MIXING TOOL M16/M14

Specially developed for mixing large quantities of material.  
The turbine effect ensures that no lumps arise.

15.12357

114,82

## EXTENSION FOR MIXER RO-1400

Length 50mm, M14 internal / external thread.

34.00550

18,52

# ANTI SLIPPING GRIP TAPES

## ROLL ANTI SLIPPING GRIP TAPES

Premium, self-adhesive non-slip grip tape, very durable, with excellent characteristics. It can be applied onto most surfaces to provide anti slip protection and safety standards e.g. onto stairs, entrances, ramps, public areas, boats, sanitary areas, trucks and buses.

For outdoor application we recommend to use edge sealer 14.11173.

Further widths and sizes upon request.

## EDGE SEALER

For anti slipping grip tape, for outdoor applications.  
Based on PVC, tubes of 50g.

14.11173

10,38

## DOUBLE-SIDED ADHESIVE TAPE 50mm x 50m

14.12240

358,89

Pack of 24 rolls.

### Technical specifications:

Carrier system: special fabric  
Pressure-sensitive adhesive: hot-melt adhesive made of synthetic rubber  
Protective cover: silicone paper, yellow  
Thickness (without cover): 0.22-0.24 mm  
Peel resistance:  $\geq 30$  N / 25 mm (DIN EN 1939)\*  
Shear resistance: 1000 g / 625 mm<sup>2</sup> (DIN EN 1943)\*  
Recommended working temperature: +10° C to +30° C  
Temperature resistance: 30°C to +80°C  
Condensation resistance: very high  
Resistance to aging: limited  
Plasticizer resistance: limited

## ADHESIVE INJECTION

15.12330

46,25

With bayonet nut connector and 2 replaceable nozzles.

# ASSEMBLY ACCESSORIES

## SPRAY ADHESIVE

Universal use in aerosols, for permanent and temporary adhesion. For paper, carton, wood, thin veneers, cork, leather, textiles, felt, foam, styrofoam, rubber etc. (except PVC and polyethylene). Temperature range: from -20 to +65°C

Box of 12 cans each 500 ml  
Single can

## DUST MASK WITH COMFORT NOSE SEAL FFP2

Classic model with ActivForm®, DuraMesh®-structure and comfort nose seal. The ActivForm® seal automatically adjusts to different face types and their movements. Due to DuraMesh®-structure these masks are strong and durable, reducing consumption. With additional comfort nose seal for comfortable breathing (air keeps cooler). According to EN149:2001, FFP2 NR D: against toxic dusts, mists and fumes based on water and oil. Pack of 3 units

22.12966

21,04

## DUST MASK WITH COMFORT NOSE SEAL FFP3

Mask with ActivForm®, DuraMesh®-structure and comfort nose seal. The ActivForm® seal automatically adjusts to different face types and their movements. Due to DuraMesh®-structure these masks are strong and durable, reducing consumption. With additional comfort nose seal for comfortable breathing (air keeps cooler) and washable, contoured full face seal. According to: EN149:2001, FFP3 R D: against all dusts, mists and fumes based on water and oil. Packed per unit

22.12967

16,64

## DUST MASK FFP2

- Tested and CE certified according to EN 149: 2001 + A1: 2009
- Special ultra-light design for maximum comfort
- Flexible and ergonomic
- Separately packaged
- Filtration of droplets when inhaled
- This product meets the requirements of the PPE regulation (EU) 2016/425
- Suitable for internal and external protection

Pack of 10 units
